In addition to that necessary treatment, health education is also given in these camps.

Patients requiring further care and surgical treatment are brought subsequently to the medical college hospital and are offered free treatment. The faculty participating in the camps will identify patients required to be referred to the medical college hospital for further management.

The postgraduate students and the interns will manage the general case load in these kinds of camps and are allowed to perform supervised surgical procedures on such patients when they are seen in the medical college hospital.
